

DUO™ Sexual Health and Wellness Questionnaire

Duo™ is an exciting new technology used in a series of quick, painless, in-office treatments. This patented shock wave therapy treatment effectively stimulates and increases blood flow. In women, it triggers a cascade of wound healing responses that stimulate blood flow restoring function and increasing intimate pleasure. For men, it increases blood flow to the penis improving erection, staying time and brings back spontaneity. *This is a comfortable 20-minute treatment that improves satisfaction for both partners.*

Duo™ is not a pill, implant, injection or topical application.

Please take a few moments to answer the questions below and then return this form to your nurse and/or medical provider upon completion.
